ABSTRACT

The ranked lists of South Carolina school district and county data contain information that may be useful to local school authorities in interpreting, comparing, and evaluating certain aspects of their educational programs. The tables were prepared from data entered in the records of public information. Data include school enrollment, attendance, assessed valuation, tax levy, school revenue receipts and expenditures, population, farm products, manufacturing products, tax receipts, employment, and earnings. Each table in this publication is presented twice, first alphabetically according to the county or district names, then numerically according to rank. (Author/MLF)

FOREWORD

The ranked lists of school district and county data contain information that may be useful to local school authorities in interpreting, comparing, and evaluating certain aspects of their educational programs. This publication might be particularly helpful in supplying information which could be utilized in the preparation of district profiles.

No attempt should be made to use the ranked data to make qualitative comparisons between districts. Other factors have a role in determining the quality of a school system and must be considered in assessing the total effectiveness of the system.

The tables in this report were prepared by the staff of the Office of Research of the State Department of Education from data recorded in the records of public information. Most of the information, in fact, is a restatement of the data found in *Annual Reports of the State Superintendent.* Unless otherwise specified, data relative to school enrollment, attendance, assessed valuation, tax levy, school revenue receipts and expenditures for public schools was obtained from the official records in the State Department of Education and from the "Annual Reports of the County Superintendents of Education." Data relative to population, farm products, manufacturing products, tax receipts, employment and earnings was obtained from the published reports of State and Federal agencies.

Each table in this publication is presented twice, first alphabetically according to the county or district names then numerically according to rank. Thus, care should be exercised in interpreting the rankings, since in some instances a low rank might be favorable while in others it might be unfavorable. Where possible, the data for Hollywood School District of Saluda County is provided.

It is hoped that the data in this report will be useful to school administrative personnel and others interested in improving the educational programs of the public schools.

ACKNOWLEDGMENT

The Office of Research acknowledges with sincere appreciation the significant assistance rendered by those persons of its staff who have made contributions to this publication. The chief responsibility for coordinating the efforts in this endeavor was that of Mrs. Eugenia Frontz, assisted by Mr. Philip Kelly. Dr. Albert Link and his staff provided automated rankings of many of the data items. Special recognition is given to Mrs. Kathy Grant and Miss Debbie Shull for their typing efforts in transforming the ranked data into the desired format. The tables were edited and typed for printing by members of the Office of Planning and Dissemination staff: Mrs. Patricia Kinsey, Editor; Mrs. Jo McKune, Assistant Editor; and Mrs. Deanna Moore, Editorial Assistant. We are also grateful to the other members of the Department staff for their spirit of cooperation and assistance with this project.

Note: Professional district staff includes district personnel classified as or in administration, supervisors or consultants, elementary and secondary teachers (excluding kindergarten), guidance counselors, librarians, and other professional staff as reported in *BEDS.* This count does not include any county personnel in multi-district organizations. Also, personnel who are located in more than one school facility are counted for as many times as they appear in different facilities; therefore, duplications are in totals.

Note: Professional district staff includes district personnel classified as or in administration, supervisors or consultants, elementary and secondary teachers (excluding kindergarten), guidance counselors, librarians, and other professional staff as reported in *BEDS*. This count does not include any county personnel in multi-district organizations. Also, personnel who are located in more than one school facility are counted as many times as they appear in different facilities; therefore, duplications are in totals.

[a]Source: South Carolina, State Department of Education, *BEDS File Report* (Fall, 1972).

Note: Includes 1972 *BEDS* position codes 52-82. This count does not include any county personnel in multi-district organizations. Also, personnel who are located in more than one school facility are counted as many times as they appear in different facilities; therefore, duplications are in totals.

[b]Official ten-day enrollment, excluding that for Juvenile Corrections and Felton Laboratory School.

[c]Schools with no supervisory staff are not assigned a rank.

[a] Source: South Carolina, State Department of Education, *BEDS File Report* (Fall, 1972).

Note: Includes 1972 *BEDS* position codes 10 and 11. This count does not include any county personnel in multi-district organizations. Also, personnel who are located in more than one school facility are counted as many times as they appear in different facilities; therefore, duplications are in totals.

[b] Official ten-day enrollment, excluding that for Juvenile Corrections and Felton Laboratory School.
